

Technical Data Sheet

RPZ-1-01

General Description

- Phosphorescent pigments for coloring plastics and coatings.
- Zinc Sulfide compound.

Applications

- Coloring plastics as acrylics, nylons, polystyrene, polyolefins & vinyl and coatings.

Product Features

- Responds quickly to excitation by daylight, incandescent, fluorescent or ultraviolet light and produces a bright green emission color.
- Afterglow is depending on pigment concentration, surface area and the amount of energy absorbed.
- Recommended concentration:
 - for plastics: 10% by weight.
 - for thick coatings: $\pm 30\%$ by weight.
- Precautions during processing:
 - Strong acids can cause dissolution of the phosphorescent pigments.
 - The presence of humidity and sunlight can exhibit darkening.
 - The intensity of the phosphorescence will be reduced by adding colorless extenders or colored pigments.

Standard Colors

Product Name	Description
RPZ-1-01	Radphos Green

Packaging:

1 box = 20kg
MOQ = 20kg

Storage & shelf life:

120 months when kept in closed original packaging in a dry place at ambient temperature.

Safety & regulatory:

Safety Data Sheet available on request.

Physical properties

Delivery form	Powder
Daylight body color	Yellow Green
Afterglow color	Green
Average particle size	26+/-3 μm
Afterglow intensity @ 1 min	>359 mcd/m ²
Afterglow intensity @ 10 min	>28 mcd/m ²
Afterglow intensity @ 60 min	>2,6 mcd/m ²
Emission peak	527 nm

(1) Test methods and Certificate of Analysis (COA) available on request.
